

a better deal.

real time monitoring of machine learning  
models using whylabs

# About me

Lev Katzav

Principal Engineer @ Vio.com

# Problem

There is a machine learning model that makes predictions in real-time based on user requests

We would like to monitor model **inputs** (features) and **outputs** (predictions) and be alerted of unexpected changes

# Solution

Whylogs - <https://github.com/whylabs/whylogs>

Whylabs - <https://whylabs.ai/>

# Demo

Lev Katzav

Principal Engineer @ Vio.com

[lev.katzav@vio.com](mailto:lev.katzav@vio.com)
